Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: Claims 1-10 directed toward Fig. 4A; and

Group II: Claims 11-29 directed toward Fig. 3B.

Applicant elected, without traverse, Group II: Claims 11-29 directed toward Fig. 3B.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In paragraph [0001] line 2 of the specification, "_____" has been replaced with --10/789,306--.

In paragraph [0001] line 3 of the specification, "_____" has been replaced with --02/27/04--.

Claims 1-10 have been canceled.

Elected claims 11-29 were found to be allowable. So as to allow the application, claims 1-10 have been canceled since there are no generic claims and since the election was made without traverse.

Allowable Subject Matter

3. Claims 11-29 appear to be allowable over the Prior Art of record. Rudolph discloses a cascode biasing circuit with circuit 7 that could be seen as a "frequency boosting circuit". However, the Prior Art of record does not appear to disclose a frequency boosting circuit that receives both a cascode bias and a main bias as recited in claims 11 and 21.
